**CARIE L. SHOPBELL**

Vice-President and Senior Application Developer

---

Carie Shopbell is the Vice-President and Senior Application Developer at Shopbell Solutions, Inc. She specializes in Lotus Notes/Domino application development and consulting. She has a background in Lotus Notes/Domino System Administration, which allows her to work on projects of all types and skill ranges. Ms. Shopbell has 9 years of Lotus Notes Technology related experience.

---

**EXPERIENCE:****Senior Application Developer**

At Eduprise, Inc., Ms. Shopbell worked as a Senior Application Developer. She was the project lead for the Domino on-line learning Administration Tool (Lotus Notes versions 4.x and 5.x). As the project lead and manager of the Administration tool life cycle, she was responsible for: requirement analysis, function specifications, prototyping, integration, testing, task management and deployment. She was also accountable for application design, documentation, data migration and implementation strategies. She coordinated and applied new development, bug fixes, and code maintenance for Domino applications. She was the Senior Lead developer for all LotusScript backend processing for Eduprise core templates, as well as the Administration Tool. Additionally, she created and implemented Java agents to interact with the Java T.E.S.T tool application.

**Manager**

At McGladrey & Pullen, Ms. Shopbell worked as a Groupware Consultant in the Extended Enterprise Group. She provided Administration services for clients including: Bringing up new Notes servers on OS/2, Novell and Windows NT, daily administration of the Notes Server, maintain/update/improve current Notes Server infrastructure and training on Notes Servers. Ms. Shopbell developed, populated, and maintained Notes databases for clients to meet their needs. She provided end-user support in a Helpdesk capacity, as well as giving training classes.

She also provided Development services for clients including: Team Member and/or Team Leader on large development projects in the following environments: Lotus Notes 4.x, Domino, Lotus Components and LotusScript.

**Corporate Support Specialist**

At Great Plains Software, Ms. Shopbell worked as a Senior Support Specialist at the internal Helpdesk. In regards to Lotus Notes (versions 2.x and 3.x), she was the main contact for end-user technical support and assisted with system administration. Also, Ms. Shopbell was in charge of developing the notes Databases for the Information Systems Operations Team. As other functions of the Helpdesk, she supported software applications used by the employees (MS Office, Lotus Freelance Graphics and Lotus 123), performed installation of software packages, trouble-shot hardware problems, supported telecommunication issues, performed Novell network administrative duties and supported electronic communication software (Lotus Notes Mail and Lotus cc:Mail).

---
